PROFESSIONAL SUMMARY

Versatile Software Engineer with 5 years of experience in frontend development and backend contributions. Specialized in building scalable, high-performance web applications using modern JavaScript technologies, with expertise in monorepo architectures, microservices, and full-stack development. Proven leadership in managing teams and delivering impactful community platforms

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Node.js
Frontend Frameworks: React 18, Next.js, Redux, Zustand
Backend Technologies: Express.js, GraphQL, REST APIs, Strapi Monorepo
Tools: Turborepo
State Management: Redux Toolkit, Zustand, React Context
Build & Scaling: Vite, Webpack, Monorepo Architectures
Testing: Jest, React Testing Library
Cloud & Infrastructure: AWS, Docker, Serverless, CI/CD Pipelines

PROFESSIONAL EXPERIENCE

Hcode Technologies (Feb-2024 - working)

Software Development Engineer (SDE-2)

- Build a platform that connects freelancers with clients, essentially acting as a digital marketplace for freelance work.
- Implement backend microservices using Redis, Kafka, and Zookeeper to handle messages and live chat with clients and members.
- Implement backend using Express.js and TypeScript, developing scalable APIs and data processing pipelines with PostgreSQL.
- Collaborated across full-stack teams to design and implement integrated solutions, bridging frontend and backend development

PAYTUNES DIGITAL AUDIO ADVERTISING

React Manager | Frontend Engineer

- Build a platform where users can easily build an ad using AI-generated ads.
- Implement backend APIs for scripting and generating better audio, banner, and video advertisements.
- ShoutL makes the generation of advertisements very fast and easy for anyone without any deep knowledge of audio editor and banner designer just simple prompt make a creative advertisements in few minutes.

Technogetic Pvt Ltd (Jan-2023-Feb-2024)

Software Engineer

- Collaborated with the PyThru Banking team to develop and implement a core payment gateway module, enabling businesses of all types to seamlessly accept payments and process payouts through a unified platform. PyThru is a complete and affordable payment platform for all business types to accept payments and make payouts. It is a one-stop solution for banking.
- Contributed to the development of an internal frontend component library at Wayfair, focusing on a component-based architecture to promote reusability and consistency across applications.

Incipient Infotech (Oct-2021-Dec-2022)

Frontend Engineer

- As a Frontend Engineer at Incipient Infotech, I developed and delivered numerous responsive React applications, consistently ensuring high-quality and user-friendly interfaces for diverse client needs.
- Vibe Now is a good one where I engineered a responsive event and booking platform with React, implementing features such as real-time availability display, secure booking flows, and user dashboards.

Booksbasket.in

Tech Stack: MERN (MongoDB, Express.js, React.js, Node.js)

Co-Founder / Software Developer

- Developed a full-stack peer-to-peer book marketplace platform using the MERN stack, enabling users to buy, sell, and trade books
- Designed and implemented user-friendly React.js interfaces with responsive design, supporting seamless book listing, search, and Created robust geolocation-based search functionality allowing users to discover and connect with book sellers in their local area.
- Developed secure authentication and user verification systems to ensure safe transactions and protect user privacy on the platform.
- Implemented advanced database schemas in MongoDB to efficiently manage user profiles, book listings, transaction histories, and
- Built comprehensive RESTful APIs with Express.js and Node.js to handle user interactions, book listing management, and real-time

AltCampus

- Enhanced Learning Management System (LMS) platform with interactive features using modern JavaScript frameworks.
- Implemented gamification techniques to improve user engagement and learning platform interactions.
- Developed internal tools to streamline platform functionality and user experience.

EDUCATION

Geeta Group of institutions: GGI | Panipat (Naultha)

2014 – 2018

Bachelor of Technology, Mechanical
