PROJECTS

Pythru Banking

It is a Banking App. Where all the banking services provided a modal to billing and easily handle. Payment Gateway uses extensive secure and reliable technology for your payment gateway.

your payments skillfully. You can embed this invoice either on your website or send it personally to your customers.

Project Contribution

Worked as a front-end developer to integrate the API of banking. worked on Ui part as well, tech use in that Mui base custom components and for styling scss

Wayfair

Wayfair provides customers with a shopping experience that lets them purchase home goods, furniture, and appliances from one site.

Project Contribution

Worked as a front-end developer to design their own component library for their own product. The Boilerplate used in this project is mono-repo which is for handling a large code base.

Paytunes.in

Paytunes is audio, banner and Video ads platform build for all over Indian brands. on going with metro ads will be soon.

Project Contribution

Worked as a React manager dealing with frontend active for web apps. In paytunes. all the website and app maintain is my responsibility.

ShoutL :- ShoutL is a new product that i have build by using latest frontend tech and Ai. Scripting usign ai and creation using ai like ideogram and Elevenlabs ai make ads more powerfull and attractive.
